

(FX) COLOR MAGIC

SLIDE

THE DUTCH WATERSLIDE EXPERIENCE

A beautiful effect in the slide is a Color Magic system, color changing rgb lights will enlighten the inside of the slide, all colors of the universe can be created.

10 RGB waterslide spots with power leds will be provided, the spots are specifically designed and produced for waterslides and the flange already has the bend of the slide for easy install. Thousands of spots have already been installed over the years and have proven to last.

Each spot is individually addressable and therefor endless variety of color shows can be programmed.

The advantage of this design is, when maintenance needs to be done on the sports, one can reach the spots from the inside of the waterslide

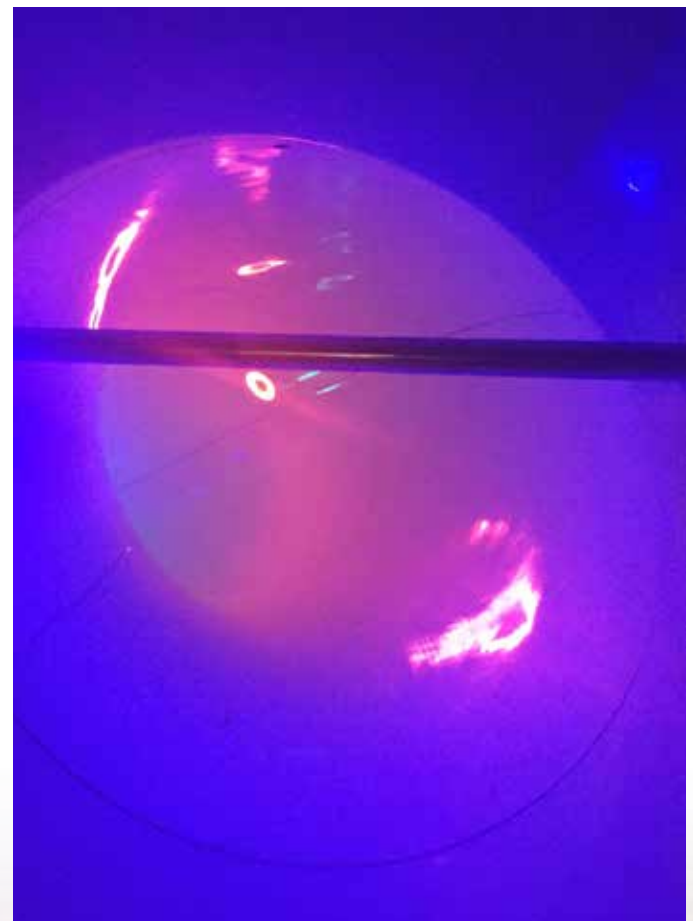

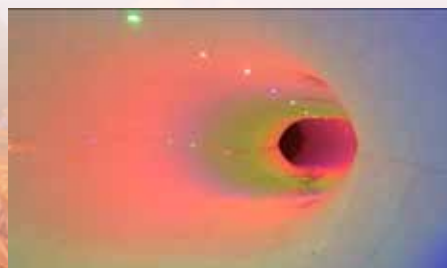

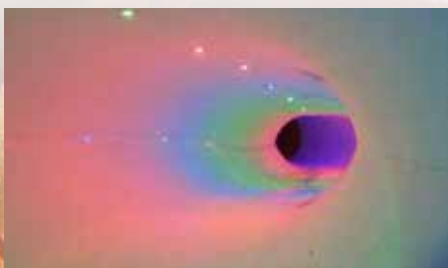

We advise to place the spots approx. 2-3 meter from each other, so a length of approx. 20-30 meters of colorful lighting is provided with on set.

In the stand alone mode the spots will change color constantly and no extra controlling is required.
