

## 1. iSlide controller

The basis of the system is the iSlide Controller, this will monitor and control all iSlide systems and is suitable for any extension of the system in the future. The controller will run stand alone and can be extended in the future with the iSlide Reverse Connection for internet connection.

The great advantage of the online content management is that we will be monitoring you iSlide system 24/7 and can change any content at any time, this making the system interactive and keeping it a exiting and always changing attraction for the Sliders.

## 2. iSlide Reverse Connection VPN server

All iSlide products communicate within an own physically separated iSlide network, this is the most reliable and reliable solution. For maintenance and Online Content Management a VPN connection needs to be made.

If an internet connection is provided to the main iSlideControl a reverse connection can be made connecting the iSlide system to the main iSlide Network.

By using a VPN tunnel with the iSlide VPN router only iSlide administrators can connect to the iSlide VPN router and use the

## Effects

## iSLIDE CONTROLLER

1. iSlide controller -> 2. iSlide Reverse Connection VPN server -> 3. Online Content Management

tunnel to reverse connect, this is secured with private /public key pairs for authentication and encryption.

We do NOT need Port Forwards in the clients router / firewall, the client network stays protected at all times.

With the online management option iSlide can update: sounds, color shows, video, traffic light timing, photo and or video streaming and system monitoring and online service.

## 3. Online Content Management

The lay out and themes of the touch screen, the video projections, the lighting effects and the sounds from the iSlide systems can be maintained through the internet.

With Christmas there can be a special Christmas theme with matching sounds and effects, this online content management option can also be ordered at a later time.

With Online Content Management you will receive every 2 months a new lay out on the screen with 4 new themes, 4 new color shows and new sounds are included.

The sliders will be constantly be surprised with a new experience in the waterslide.

This way we can respond to new trends and ever changing expectations from the visitors.

An internet connection must be provided by third party.
