SLIDE

THE DUTCH WATERSLIDE EXPERIENCE

Find your picture and send it to your e-mail

Today's sliders are used in sharing their special moments through social media with their family and friends. Research shows that 80% of all data over the internet is photo / video streaming.

iSlide has developed a system where photo's are taken and for people to send to their e-mail and social media. Thousands of pictures are taken every week with the iSlide Photo Shoot systems. This is proven technology which has developed over the past years and is part of the iSlide succes.

If you have chosen the Action Photo option you can find your Photo on a tablet that is placed on a large visual. You can easily find your picture in timeframes of 30 minutes and send it to your e-mail address. The system is safe because the pictures are only taken if chosen and remain on a local server and can only be send to a private e-mail adres. The time that the picture is visual on the tablet is variable, we can set this time ...

The photo can be deleted on site.

Also multiple locations for putting the tablets is possible, see the example (poolarea and reception or any location you want to).

We will supply :

- A visual with the size of : 2000 x 1400 mm
- A server (in IP enclosure) for locally storing the pictures
- A acces point for wifi connection
- A tablet, waterproof including cradle to put it to the wal
- The first page is a photo page on which the pictures of YOUR sliders of that day are displayed.
- The pictures are shown in a time block of 30 minutes.

The second page shows the chosen picture.

The slider can post this picture to social media.
