

(FX) ISLIGHTSCAN

SLIDE
THE DUTCH WATERSLIDE EXPERIENCE

When you are in doubt if light effects can be more original, more beautiful and more spectacular than they already were, than we can take away your doubt. iSlide is launching the iS-lightScan, a fourfold scan effect which is absolutely room filling. Four separate scan systems and four separate LED-clusters provide for a variety and combination in every light show.

The iSlightScan is produced out of four separate scan systems. Every mirror can make smooth movements, by means of a special motor. Thanks to high quality stepper motors it is possible to move it very fast en easy, or smooth and slow. On every of the four mirrors an separate LED-cluster is shining. With this you can make various fans, tunnels and lots of other patterns.

The products are build into special outdoor enclosures and are supplied as a ready to install kit.

The system can run stand alone or can be controlled by a interactive slide controller .
