**SLIDE**  
THE DUTCH WATERSLIDE EXPERIENCE

## Your action photo the end of the slide.

Today's sliders are used in sharing their special moments through social media with their family and friends. Research shows that 80% of all data over the internet is photo / video streaming.

iSlide has developed a system where photo's are taken and for people to send to their e-mail and social media. Thousands of pictures are taken every week with the iSlide Photo Shoot

## Effects

THE SLIDE...

systems. This is proven technology which has developed over the past years and is part of the iSlide succes.

At the end of the slide your action picture will be taken by a camera. This picture can be send directly to your e-mail adress if the RFID option is chosen, or the picture can be seen on a 42" TV screen, or the pictures can be found on a large visual containing tablets ( Photo to e-mail package )

If the PhotoShoot runs stand alone a push button at the start will be used for choosing that the picture needs to be taken.

When the PhotoShoot will be placed in combination with an Aqua Smash and/or Photo to e-mail connection, then also ones points, slide speed and reference time will be projected on the screen.
