

(FX) SLIDE VIDEO STREAMING

SLIDE
THE DUTCH WATERSLIDE EXPERIENCE

Slide VIDEO streaming in a Cone.

In the Cone a camera will make a short movie of the sliders on their way to the highest point.

From the video a screen shot will be displayed on a TV in the swimming pool with the actual time and the scored points. The time is the reference to the photo site which will be delivered in the Social Media package ..

The SlideVideoStream can run "stand alone" for projection on the TV screen or can be extended in a later stage with connection to social media, Slide Champ, Aqua Smash.

When the SlideFilmStream will be placed in combination with an Aqua Smash and/or Social Media connection, then also ones points, slide speed and reference time will be projected on the screen.
