iSLIDE
THE DUTCH WATERSLIDE EXPERIENCE

Interactive slide controller

Maximum interactivity by using a touch screen at the entrance of the slide. The content can be managed by iSlide over the internet, this making each visit a unique experience for the sliders. Theme's can even be customized and will be suited for special events like Halloween, Christmas, ect

With the touch screen the layout of the screen and all effects in the iSlide can be changed over the internet, so with Christmas there can be a special Christmas theme with matching sounds and effects, the Online Content Management option needs to be ordered.

The lay out of the screen is divided in 4 themes, this way all visitors can have the show they like, small children can choose Snow-white effects and for young kids F1 or party effects are possible. The effects will be in sync with the sounds (optional : sound module) and the colors and shows of the lighting (White Magic). Also all visual effects will be controlled with the touch screen, 3D projections, surface projections.

It is possible to customize the new effects on-line for the client.

THE SLIDE...

Hereby an example of the lay out of the touch screen, where one can choose out of 4 themes.

If the theme is chosen a sub screen will give the options for the effects within the theme.

If the end sensor is triggered a random choice will be selected, this to maximize the capacity.
